

THE SPACEMAN

You know about rockets, and you might know about spaceplanes, and you might even have heard of the space elevator. But, there are other weirder ways to get yourself to space. Have you heard of the rocket balloon? The space-gun? The pogo stick to space? Yes, that's a real thing. Well, anyway, it's a thing that a NASA scientist told us might actually produce some fuel efficiency for a rocket. To find out more about why you might want to bounce a rocket before sending it into the sky, check out *SOONISH: Ten Emerging Technologies That'll Improve And/Or Ruin Everything*.
